## Product Manager

Nationality: Swiss • Age: 32

bordenca.tobias@gmail.com • 076 522 47 52 • Lausanne • [linkedin.com/in/tbordenca](https://www.linkedin.com/in/tbordenca)

### WORK EXPERIENCE

#### Evooq

Product Manager

**Jul. 2023 – Jul. 2025**

*Lausanne, Switzerland*

- Accompanied multiple products from early conception to large scale adoption by banks all over the world (J.P. Morgan, DBS, UOB, Indosuez WM, ...)
- Built data anonymization and clean-up in core systems of the platform to ensure compliance with both the Data Protection Act and with the bank's regulations regarding hosting components on the cloud which use CIDs.
- Enabled the delivery of LLM supported investment proposal summaries for end clients, effectively reducing the time to finalize an investment proposal to a fraction of the original time.
- Owned domain expertise for wealth management and financial products, resolving complex business-regulatory-technical trade-offs and unblocking product decisions that enabled timely delivery of compliant platform features.
- Overhauled Evooq's portfolio optimizer from methodology to UX, by simplifying common use-cases, which ended up massively increasing adoption and adding additional 2M ARR.
- Owned the company's regulatory watch (e.g., LSFIn, MiFID II, ...), mapping new changes to actual required changes across the platforms, and dispatching them to relevant product teams.
- Run a multi-module multi-team roadmap which balanced solving client problems and technical advances, resulting in low technical debt and timely bug fixes.

#### Evooq

Product Owner

**Oct. 2022 – Jan. 2025**

*Lausanne, Switzerland*

- Built a data pipeline ingesting technical and macro economical data, transforming technical documents that would take a day to build into real-time dashboards.

#### Evooq

Software Engineer

**Feb. 2019 – Oct. 2022**

*Lausanne, Switzerland*

- Delivered a user-facing portfolio optimizer by collaborating closely with product and quant teams, reducing the time from portfolio construction to conversion by over 200%.
- Researched and developed a recommendation engine for financial products using a dataset of 11k client profiles; the proof of concept was integrated into the product and became a long-term differentiator.

#### Credit Suisse

Data Science Intern

**Feb. 2018 – Aug. 2018**

*Lausanne, Switzerland*

### EDUCATION

#### Federal Institute of Technology Lausanne (EPFL)

MSc in Computer Science

**Aug. 2019**

*Lausanne, Switzerland*

- Focused on Foundations of Software and Machine Learning.
